THE ENTERTAINER

The Entertainer bi-fold system from Dynamic Closures has been designed to make the most of your entertaining space by enabling the outdoors to be easily integrated with the internal areas of your home.

Fitted with bottom rollers requiring minimal overhead structural support, **The Entertainer** system operates smoothly, quietly and effortlessly. The unique design incorporates snug fitting seals to keep out inclement weather and optional retractable fly screens mean you can make the most of balmy summer nights without the mozzies!

Available in single or double glazed for additional heat and noise management.

SPECIFICATIONS

Supply and install **THE ENTERTAINER** by Dynamic Closures (specify).

WORK EXCLUDED

The general contractor shall provide a square and level prepared opening.

CONSTRUCTION

Meeting stiles shall be overlapped extruded aluminium members (71mm x 45mm). Sections shall be extruded from aluminium and constructed in accordance with details shown on drawings.

PANELS

Available in the following materials:
(6.38mm) Clear Laminated Glass
(6mm) Clear Tempered Glass

FINISH

Available in our standard high quality clear anodised finish, standard powder coat finishes or premium timber grain powder coat finish.

HARDWARE

To be aluminium hinges, with head set hinges to have nylon roller guides with double bottom rollers for greater stability. Flush bolt locking for intermediates. Top and bottom locking at entry points.

LAYOUT

Stacks left and/or right side of opening also available in bi-part stacking (half left and half right). It is imperative that all openings are square and level.

OPTIONAL EXTRAS

Retractable flyscreens available as an optional extra so you can make the most of your wide opening without letting bugs, flies and mosquitos in.
